

# Letters to the Editor

## Sounds in Space

Although your recent editorials on the inadequacy of the Government in meeting the Russian challenge have been well balanced and intelligent, I beg permission to call your attention to a salient fact that you are overlooking in your analysis of these events—namely that Allen Dulles and his Central Intelligence Agency are simply not doing their job.

We have only to look at the well-reported shock our Government experiences over the Russian ICBM, Sputnik I, and Sputnik II to have this point driven home to us. Let us ask: Where art thou CIA?

ROGER S. DARLING  
Falls Church, Va.
